VITAL STATISTICS

Ninth Annual Report

PREFACE

The present is the Ninth Annual Report on Vital Statistics to be issued by the Dominion Bureau of Statistics on data obtained under arrangement with provincial Registration Departments. It is the fourth report covering all provinces.

The First, Second and Third Annual Reports contain a full account of the origin and purpose of the agreement between the Dominion and the provinces for the production of vital statistics, together with a sketch of the earlier development of these statistics in Canada. Registration of births, deaths and marriages is carried out by the provincial authorities, each province having passed an act making registration compulsory and prescribing that certain items of information be obtained on a uniform basis. Transcripts of the certificates are forwarded to the Dominion Bureau of Statistics and from these the Annual Reports for Canada are compiled. For the year 1929, in addition to the preparation of tables for the present volume, the Bureau of Statistics issued monthly reports and a preliminary annual report, and supplied to all provinces the compilations required for their respective reports.

As in past years, the statistics of births, deaths and marriages among the Indian population of the co-operating provinces are included in the present report. They are also given separately in Appendix I. A summary of the vital statistics of Yukon and the Northwest Territories forms Appendix II.

Appendix III contains the schedule of Census Divisions in the Prairie Provinces. Maps showing the boundaries of these Divisions are not included, but may be found in the Eighth Annual Report.

Owing to the lapse of time since the Census of 1921, it has been decided to issue the present volume without text, deferring the more detailed analysis until the results of the Census of 1931 are available. In order, however, that the most essential figures for rates and comparisons in time shall be available to the reader, sixteen tables containing such figures have been included in the report. They comprise the first section, under the title "Comparative and Analytical Tables".

The collection of the data and the preparation of the Report were under the direction of Mr. E. S. Macphail, Chief of the Demography Branch of the Bureau, assisted by Mr. W. R. Tracey.

Dominion Statistician.

PREFACE

Le présent rapport annuel sur les Statistiques Vitales du Canada est le neuvième de la série que publie le Bureau Fédéral de la Statistique sur des données obtenues en vertu d'ententes avec les départements provinciaux. C'est le quatrième rapport couvrant toutes les provinces du Canada.

Le premier, le deuxième et le troisième rapports annuels donnent un aperçu complet de l'origine et du but de cette entente entre le Dominion et les provinces pour la compilation des statistiques vitales et décrivent les progrès de ces statistiques au Canada. L'enregistrement des naissances, décès et mariages est fait par les autorités provinciales, chaque province ayant décrété l'enregistrement obligatoire suivant des formules tendant à établir certaines informations sur des bases uniformes. Des copies de ces actes sont envoyées au Bureau Fédéral de la Statistique et leur compilation sert de base au rapport annuel. En 1929, le Bureau Fédéral de la Statistique, outre la préparation de ces tableaux, a publié des bulletins mensuels et un rapport annuel préliminaire. Il a de plus fourni à toutes les provinces les compilations dont elles avaient besoin pour leurs rapports respectifs.

Comme par le passé, on a fait entrer dans ce rapport les naissances, décès et mariages de la population indienne des provinces coopérant au présent rapport. Ils sont aussi donnés séparément dans l'Appendice I. Un résumé des statistiques vitales des Territoires du Nord-Ouest et du Yukon forme l'Appendice II.

La cédule des divisions du recensement situées dans les provinces des Prairies paraît à l'appendice III. Les cartes où figurent les limites de ces divisions n'y sont pas comprises; elles font partie du huitième rapport annuel.

Vu le laps de temps écoulé depuis le recensement de 1921, il n'a pas été jugé nécessaire d'accompagner les tableaux composant le présent volume du texte analytique ordinaire, remettant une analyse plus détaillée jusqu'à ce que soient connus les chiffres du recensement de 1931. Cependant, pour que le lecteur ait toujours les chiffres les plus essentiels des taux et des comparaisons de temps, ces chiffres ont été incorporés en seize tableaux formant la première section et appelés "Tableaux comparatifs et analytiques".

Le dépouillement des données et la préparation du rapport ont été faits sous la direction de M. E. S. Macphail, chef de la section de Démographie du Bureau, aidé par M. W. R. Tracey.

Statisticien du Dominion.

(2) Comprising all provinces except Quebec—Comprenant toutes les provinces excepté le Québec.

(3) Vital Statistics of Kent Co., New Brunswick, were not collected until May 1, 1921. Therefore in computing rates for that year one-third of the population of this county has been excluded, reducing the figure for New Brunswick to 379,904 and that of the Registration Area to 6,406,682—Les statistiques du comté de Kent, Nouveau-Brunswick, n'existent que depuis le 1er mai 1921. On a donc dû exclure pour cette année-là un tiers de la population de ce comté, réduisant ainsi la population du Nouveau-Brunswick à 379,904 et celle du territoire d'enregistrement à 6,406,682.

NOTE.—Populations for 1921 and those of Manitoba, Saskatchewan and Alberta for 1926 are census figures. Remaining figures are estimates—La population de 1921 et celle de 1926 pour le Manitoba la Saskatchewan et l'Alberta sont celles des recensements; les chiffres des autres années sont estimatifs.

[1] Exclusive of Yukon and the Northwest Territories, statistics for which are given in Appendix II—Ne comprend pas le Yukon et les Territoires du Nord-Ouest dont les statistiques sont données dans l'Appendice II.

NOTE.—"Urban" includes cities and towns of 1,000 population and over, "Rural" the remaining parts. The classification of cities and towns in Manitoba, Saskatchewan and Alberta is according to the Census of 1926, in the remaining provinces according to the Census of 1921. For number of marriages in each city and town of 1,000 population and over, see table 18, pages 34-38—"Urbains" comprend les cités et villes ayant une population de 1,000 habitants et au-dessus, le reste est inclus avec "Ruraux". La classification des cités et villes dans le Manitoba, la Saskatchewan et l'Alberta est selon le recensement de 1926 et dans toutes les autres provinces selon le recensement de 1921. Pour le nombre des mariages de chaque cité et ville de 1,000 âmes et plus, voir tableau 18, pages 34-38.

APPENDIX I

BIRTHS AND DEATHS AMONGST THE INDIAN POPULATION

APPENDICE I

NAISSANCES ET DÉCÈS DE LA POPULATION INDIENNE

APPENDIX I

BIRTHS AND DEATHS AMONGST THE INDIAN POPULATION

The totals of births, deaths and marriages presented in the general tables of the present report include returns for Indians, resembling in this respect the corresponding tables of previous reports. The births and deaths of Indians in Canada form only an inconsiderable portion of the whole but this is not so true of certain provinces considered individually. Moreover, in particular aspects of Vital Statistics, e.g., deaths from tuberculosis, the figures for Indians assume an importance beyond the numerical proportion of this class in the population. In the present volume, therefore, as in the Seventh and Eighth Annual Reports, it has been thought well to supplement the general tables with an appendix containing the salient features of births and deaths of Indians. Not only will these tabulations enable a special study of the vital statistics of the Indian population, but they will also place the reader in a position to eliminate from the general tables the influence of Indian births or deaths. Indian marriages cannot be separately tabulated since the racial origin of bride and groom is not given on the marriage certificate. In any case such figures would have little significance in so far as the pagan Indians are concerned, as the marriages of these people according to their own customs are not included in the figures recorded.

The term "Indian" as used in these tables includes half-breeds.

The statistics for Indians cannot be considered as having the same degree of completeness as those for the white population. With regard to the accuracy of particular phases of the statistics, such as ages, it is probable that in many cases the knowledge of the informants is vague. As to reported causes of death, a large proportion of these are from others than physicians. Statistics of legitimacy of children born have doubtful significance for the Indian population, owing to the informal method of marriage amongst pagan Indians.

APPENDICE I

NAISSANCES ET DÉCÈS DE LA POPULATION INDIENNE

Les totaux des naissances, décès et mariages dans les tableaux d'ensemble du présent rapport comprennent ceux des Indiens, comme dans les tableaux correspondants des rapports antérieurs. Les naissances et décès d'Indiens au Canada ne forment qu'une portion minime du total, mais il n'en est pas ainsi quand chaque province est considérée séparément. De plus, sous certains aspects des statistiques vitales, comme dans les décès causés par la tuberculose, les chiffres des Indiens prennent une importance dépassant leur proportion numérique de la population. Dans le présent volume, il a été jugé opportun comme dans le Septième et Huitième Rapports Annuels d'ajouter aux tableaux d'ensemble de ce volume un appendice contenant les données principales sur les naissances et les décès d'Indiens. Non seulement ces tableaux permettent de faire une étude spéciale des statistiques vitales de la population indienne, mais ils mettent aussi le lecteur en état de les éliminer des tableaux d'ensemble, pour l'influence que peuvent y avoir les naissances et décès d'Indiens.

Il est impossible de computer séparément les mariages d'Indiens, parce que l'origine raciale de l'époux et de l'épouse n'est pas donnée sur le certificat de mariage. Dans tous les cas ces chiffres n'auraient que très peu d'importance, en autant que sont concernés les Sauvages encore païens, parce que les mariages contractés selon leur coutume ne sont pas inclus dans les chiffres relevés.

Le terme "Indien", dans ces tableaux, comprend aussi les métis.

Les statistiques des Indiens ne peuvent pas être considérées comme aussi complètes que celles de la population blanche. Pour ce qui est de l'exactitude de certaines phases particulières des statistiques, comme les âges, il est probable que, dans plusieurs cas, la connaissance de ceux fournissant l'information était plutôt vague. Pour ce qui est des causes de décès, telles que données, il faut aussi se rappeler que la plupart de ces causes ne sont pas celles données par les médecins. Les statistiques de la légitimité des naissances ont une signification douteuse pour la population indienne, parce que le mariage est un contrat plutôt simple chez les Indiens païens.

APPENDIX III

SCHEDULE OF CENSUS DIVISIONS IN PRAIRIE PROVINCES

APPENDICE III

DIVISIONS DE RECENSEMENT DANS LES PROVINCES DES PRAIRIES

SCHEDULE OF CENSUS DIVISIONS IN PRAIRIE PROVINCES

There being no fixed political divisions in Manitoba, Saskatchewan and Alberta corresponding to counties in Eastern Canada, it was deemed advisable, in compiling and publishing the results of the Census of 1921, to divide these provinces for statistical purposes into "Census Divisions," each containing a certain number of rural municipalities, "local improvement districts," cities, towns and incorporated villages. The object of this demarcation was to obtain permanent units smaller than the provinces for comparisons extending over a number of years. The same "Divisions" have been adopted in the present Report.

Maps are inserted, showing the boundaries of the "Divisions" by red lines; the municipalities contained within "Divisions" by heavy black lines and the townships within municipalities by faint black lines. The numbers enclosed in red circles on the maps refer to the numbers assigned to the "Divisions"; the black figures refer to municipalities or local improvement districts (L.I.D.).

The following schedule gives the rural municipalities by name and number (the latter in parenthesis) together with the cities, towns and villages comprised within each "Census Division," according to the Census of 1921. Local Improvement Districts and Unorganized Territorial Units in Saskatchewan and Alberta are given by number only.

DIVISIONS DE RECENSEMENT DANS LES PROVINCES DES PRAIRIES

Le Manitoba, la Saskatchewan et l'Alberta ne possédant pas de divisions politiques correspondant aux comtés de l'est du Canada, on a cru devoir, aux fins de la compilation et de la publication des résultats du recensement de 1921, diviser ces provinces, pour les besoins de la statistique, en "divisions de recensement," chacune de celles-ci contenant un certain nombre de municipalités rurales, de "districts d'améliorations locales," de cités, de villes et de villages incorporés. En établissant ces lignes de démarcation on a créé des unités territoriales permanentes, plus petites que les provinces et facilitant les comparaisons pendant un certain nombre d'années. Ce sont ces unités territoriales que l'on trouvera dans le présent rapport.

Sur les cartes ci-jointes, les limites des divisions sont figurées par des lignes rouges, celle des municipalités qui sont contenues dans les divisions par d'épaisses lignes noires et celles des cantons par de minces lignes noires.

Les nombres entourés d'un cercle rouge sont les numéros donnés aux divisions; les chiffres en noir sont les numéros des municipalités ou des districts d'améliorations locales (D.A.L.).

On trouvera dans la liste qui suit l'énumération des municipalités rurales, par nom et numéro (ce dernier entre parenthèses) ainsi que les cités, villes et villages composant chacune des "division de recensement," selon le recensement de 1921. Les districts d'améliorations locales et les unités des territoires inorganisés de la Saskatchewan et de l'Alberta sont indiqués simplement par un numéro.

PREFACE

The present is the Tenth Annual Report on Vital Statistics to be issued by the Dominion Bureau of Statistics on data obtained under arrangement with provincial Registration Departments. It is the fifth report covering all provinces.

The First, Second and Third Annual Reports contain a full account of the origin and purpose of the agreement between the Dominion and the provinces for the production of vital statistics, together with a sketch of the earlier development of these statistics in Canada. Registration of births, deaths and marriages is carried out by the provincial authorities, each province having passed an act making registration compulsory and prescribing that certain items of information be obtained on a uniform basis. Transcripts of the certificates are forwarded to the Dominion Bureau of Statistics and from these the Annual Reports for Canada are compiled. For the year 1930, in addition to the preparation of tables for the present volume, the Bureau of Statistics issued quarterly reports and a preliminary annual report, and supplied to all provinces the compilations required for their respective reports.

As in past years, the statistics of births, deaths and marriages among the Indian population of the co-operating provinces are included in the present report. They are also given separately in Appendix I. A summary of the vital statistics of Yukon and the Northwest Territories forms Appendix II.

Appendix III contains the schedule of Census Divisions in the Prairie Provinces. Maps showing the boundaries of these Divisions are not included, but may be found in the Eighth Annual Report.

The present volume is issued without text, in this manner resembling the Ninth Annual Report. In order, however, that the most essential figures for rates and comparisons in time shall be available to the reader, eighteen tables containing such figures have been included in the report. They comprise the first section, under the title "Comparative and Analytical Tables".

The collection of the data and the preparation of the Report were under the direction of Mr. E. S. Macphail, Chief of the Demography Branch of the Bureau, assisted by Mr. W. R. Tracey.

R. H. COATS,
Dominion Statistician.

PREFACE

Le présent rapport annuel sur les Statistiques Vitales du Canada est le dixième de la série que publie le Bureau Fédéral de la Statistique sur des données obtenues en vertu d'ententes avec les départements provinciaux. C'est le cinquième rapport couvrant toutes les provinces du Canada.

Le premier, le deuxième et le troisième rapports annuels donnent un aperçu complet de l'origine et du but de cette entente entre le Dominion et les provinces pour la compilation des statistiques vitales et décrivent les progrès de ces statistiques au Canada. L'enregistrement des naissances, décès et mariages est fait par les autorités provinciales, chaque province ayant décrété l'enregistrement obligatoire suivant des formules tendant à établir certaines informations sur des bases uniformes. Des copies de ces actes sont envoyées au Bureau Fédéral de la Statistique et leur compilation sert de base au rapport annuel. En 1930, le Bureau Fédéral de la Statistique, outre la préparation de ces tableaux, a publié des bulletins trimestriels et un rapport annuel préliminaire. Il a de plus fourni à toutes les provinces les compilations dont elles avaient besoin pour leurs rapports respectifs.

Comme par le passé, on a fait entrer dans ce rapport les naissances, décès et mariages de la population indienne des provinces coopérant au présent rapport. Ils sont aussi donnés séparément dans l'Appendice I. Un résumé des statistiques vitales des Territoires du Nord-Ouest et du Yukon forme l'Appendice II.

La cédule des divisions du recensement situées dans les provinces des Prairies paraît à l'Appendice III. Les cartes où figurent les limites de ces divisions n'y sont pas comprises; elles font partie du huitième rapport annuel.

Le présent volume ne contient pas de texte, étant ainsi similaire au neuvième rapport annuel. Cependant, pour que le lecteur ait toujours les chiffres les plus essentiels des taux et des comparaisons de temps, ces chiffres ont été incorporés en dix-huit tableaux formant la première section et appelés "Tableaux comparatifs et analytiques".

Le dépouillement des données et la préparation du rapport ont été faits sous la direction de M. E. S. Macphail, chef de la section de Démographie du Bureau, aidé par M. W. R. Tracey.

(1) Yukon and the Northwest Territories, with a population of 11,363 in 1931 are not included. Tables of births, deaths and marriages for these Territories are however given in Appendix II—Le Yukon et les territoires du Nord-Ouest, dont la population s'élevait à 11,363 en 1931, sont exclus de ce tableau. Les tableaux des naissances, des décès et des mariages pour ces territoires sont donnés dans l'Appendice II.

(2) Comprising all provinces except Quebec—Comprenant toutes les provinces excepté le Québec.

(3) Vital Statistics of Kent Co., New Brunswick, were not collected until May 1, 1921. Therefore in computing rates for that year one-third of the population of this county has been excluded, reducing the figure for New Brunswick to 379,904 and that of the Registration Area to 6,406,682—Les statistiques du comté de Kent, Nouveau-Brunswick, n'existent que depuis de ler mai 1921. On a donc dû exclure pour cette année-là un tiers de la population de ce comté, réduisant ainsi la population du Nouveau-Brunswick à 379,904 et celle du territoire d'enregistrement à 6,406,682.

NOTE.—Populations for 1921 and 1931 and those of Manitoba, Saskatchewan and Alberta for 1926 are census figures. Remaining figures are estimates—La population de 1921 et 1931 et celle de 1926 pour le Manitoba, la Saskatchewan et l'Alberta sont celles des recensements; les chiffres des autres années sont estimatifs.

NOTE.—"Urban" includes cities and towns of 1,000 population and over, "Rural" the remaining parts. The classification of cities and towns in Manitoba, Saskatchewan and Alberta is according to the Census of 1926, in the remaining provinces according to the Census of 1921. For the number of marriages in each city and town of 1,000 population and over, see table 20, pages 36-40—"Urbains" comprend les cités et villes ayant une population de 1,000 habitants et au-dessus, le reste est inclus avec "Ruraux". La classification des cités et villes dans le Manitoba, la Saskatchewan et l'Alberta est selon le recensement de 1926, dans toutes les autres provinces selon le recensement de 1921. Pour le nombre des mariages de chaque cité et ville de 1,000 âmes et plus, voir tableau 20, pages 36-40.

APPENDIX I

BIRTHS AND DEATHS AMONGST THE INDIAN POPULATION

APPENDICE I

NAISSANCES ET DECES DE LA POPULATION INDIENNE

APPENDIX I

BIRTHS AND DEATHS AMONGST THE INDIAN POPULATION

The totals of births, deaths and marriages presented in the general tables of the present report include returns for Indians, resembling in this respect the corresponding tables of previous reports. The births and deaths of Indians in Canada form only an inconsiderable portion of the whole but this is not so true of certain provinces considered individually. Moreover, in particular aspects of Vital Statistics, e.g., deaths from tuberculosis, the figures for Indians assume an importance beyond the numerical proportion of this class in the population. In the present volume, therefore, as in the Seventh, Eighth and Ninth Annual Reports, it has been thought well to supplement the general tables with an appendix containing the salient features of births and deaths of Indians. Not only will these tabulations enable a special study of the vital statistics of the Indian population, but they will also place the reader in a position to eliminate from the general tables the influence of Indian births or deaths. Indian marriages cannot be separately tabulated since the racial origin of bride and groom is not given on the marriage certificate. In any case such figures would have little significance in so far as the pagan Indians are concerned, as the marriages of these people according to their own customs are not included in the figures recorded.

The term "Indian" as used in these tables includes half-breeds.

The statistics for Indians cannot be considered as having the same degree of completeness as those for the white population. With regard to the accuracy of particular phases of the statistics, such as ages, it is probable that in many cases the knowledge of the informants is vague. As to reported causes of death, a large proportion of these are from others than physicians. Statistics of legitimacy of children born have doubtful significance for the Indian population, owing to the informal method of marriage amongst pagan Indians.

APPENDICE I

NAISSANCES ET DECES DE LA POPULATION INDIENNE

Les totaux des naissances, décès et mariages dans les tableaux d'ensemble du présent rapport comprennent ceux des Indiens, comme dans les tableaux correspondants des rapports antérieurs. Les naissances et décès d'Indiens au Canada ne forment qu'une portion minime du total, mais il n'en est pas ainsi quand chaque province est considérée séparément. De plus, sous certains aspects des statistiques vitales, comme dans les décès causés par la tuberculose, les chiffres des Indiens prennent une importance dépassant leur proportion numérique de la population. Dans le présent volume, il a été jugé opportun comme dans le Septième, Huitième et Neuvième Rapports Annuels d'ajouter aux tableaux d'ensemble de ce volume un appendice contenant les données principales sur les naissances et les décès d'Indiens. Non seulement ces tableaux permettent de faire une étude spéciale des statistiques vitales de la population indienne, mais ils mettent aussi le lecteur en état de les éliminer des tableaux d'ensemble, pour l'influence que peuvent y avoir les naissances et décès d'Indiens.

Il est impossible de computer séparément les mariages d'Indiens, parce que l'origine raciale de l'époux et de l'épouse n'est pas donnée sur le certificat de mariage. Dans tous les cas ces chiffres n'auraient que très peu d'importance, en autant que sont concernés les Sauvages encore païens, parce que les mariages contractés selon leur coutume ne sont pas inclus dans les chiffres relevés.

Le terme "Indien", dans ces tableaux, comprend aussi les métis.

Les statistiques des Indiens ne peuvent pas être considérées comme aussi complètes que celles de la population blanche. Pour ce qui est de l'exactitude de certaines phases particulières des statistiques, comme les âges, il est probable que, dans plusieurs cas, la connaissance de ceux fournissant l'information était plutôt vague. Pour ce qui est des causes de décès, telles que données, il faut aussi se rappeler que la plupart de ces causes ne sont pas celles données par les médecins. Les statistiques de la légitimité des naissances ont une signification douteuse pour la population indienne, parce que le mariage est un contrat plutôt simple chez les Indiens païens.

APPENDIX III

SCHEDULE OF CENSUS DIVISIONS IN PRAIRIE PROVINCES

APPENDICE III

DIVISIONS DE RECENSEMENT DANS LES PROVINCES DES PRAIRIES

SCHEDULE OF CENSUS DIVISIONS IN PRAIRIE PROVINCES

There being no fixed political divisions in Manitoba, Saskatchewan and Alberta corresponding to counties in Eastern Canada, it was deemed advisable, in compiling and publishing the results of the Census of 1921, to divide these provinces for statistical purposes into "Census Divisions," each containing a certain number of rural municipalities, "local improvement districts," cities, towns and incorporated villages. The object of this demarcation was to obtain permanent units smaller than the provinces for comparisons extending over a number of years. The same "Divisions" have been adopted in the present Report.

The following schedule gives the rural municipalities by name and number (the latter in parenthesis) together with the cities, towns and villages comprised within each "Census Division," according to the Census of 1921. Local Improvement Districts and Unorganized Territorial Units in Saskatchewan and Alberta are given by number only.

MANITOBA

Division No. 1 comprises the municipalities of Birch River (1), Hanover (2), La Broquerie (3), Piney (4), Ste. Anne (5), Sprague (6), Stuartburn (7), Taché (8); Unorganized parts East of the Principal Meridian between townships 3 and 10 (9).

Division No. 2 comprises the municipalities of De Salaberry (1), Franklin (2), Montcalm (3), Morris (4), Rhineland (5), Roland (6), Stanley (7), Thompson (8); Indian Reserve—Roseau Band; Towns—Emerson, Morden, Morris; Villages—Gretna, Plum Coulee, Winkler.

DIVISIONS DE RECENSEMENT DANS LES PROVINCES DES PRAIRIES

Le Manitoba, la Saskatchewan et l'Alberta ne possédant pas de divisions politiques correspondant aux comtés de l'est du Canada, on a cru devoir, aux fins de la compilation et de la publication des résultats du recensement de 1921, diviser ces provinces, pour les besoins de la statistique, en "division de recensement", chacune de celles-ci contenant un certain nombre de municipalités rurales, de "districts d'améliorations locales", de cités, de villes et de villages incorporés. En établissant ces lignes de démarcation on a créé des unités territoriales permanentes, plus petites que les provinces et facilitant les comparaisons, pendant un certain nombre d'années. Ce sont ces unités territoriales que l'on trouvera dans le présent rapport.

On trouvera dans la liste qui suit l'énumération des municipalités rurales, par nom et numéro (ce dernier entre parenthèses) ainsi que les cités, villes et villages composant chacune des "divisions de recensement", selon le recensement de 1921. Les districts d'améliorations locales et les unités des territoires inorganisés de la Saskatchewan et de l'Alberta sont indiqués simplement par un numéro.
